

ICL PUBLIC INQUIRY

Proposed issues :-

44 Campbell Downie (Inquiry Witness 1)

A. Attitude and response to HSE

- Correspondence between ICL and HSE.
- His involvement in relation to the proposed drench system. His explanation for the exchanges with Mr Stott in connection with the HSE and the drench system in particular.

B. General involvement in the company (including the following) :-

- His involvement in the 1969 negotiations with Calor Gas.
- His involvement in the levelling of the yard in 1973.
- His involvement in the creation of the basement in about 1980.
- His involvement in the proposal to convert to mains gas – why was this not pursued ?
- His involvement in relation to the proposed drench system (repeated from issue A above).

C. Why was no expert input obtained for the creation of a risk assessment ?

D. Can he provide any further assistance with regard to the document “the disaster plan” (ICL 12718-12719)
