

ICL INQUIRY STATEMENT

MRS SHEENA O'BRIEN

1. I have the following questions and points that I would like noted at the public inquiry.
2. In the statement of Lorna Downie, she states that Colin Foard was the Managing Director of Stockline Plastics at the time of the accident. From what I can remember my father was the Managing Director at that time. In fact the old business cards that I have from the time of the accident state that Stewart McColl was Managing Director and Colin Foard was the Commercial Director.
3. Also in Lorna's statement, she says Annette and myself attended ICL Technical meetings every Friday along with Nick Downie, Bill Masterton, Peter Ferguson and Ian Mavers. Annette and I had nothing to do with ICL Technical and never attended any meetings at any time. The only meetings that Annette and I attended together were sales, marketing and product training meetings conducted by Stockline Plastics or its suppliers. Also I attended Stockline management meetings.
4. In the statement of Ian Mavers, he stated that: "I think that on the Thursday prior to the accident, Stewart had asked what I was working on in the ovens. This was because there was a putrid, sickly smell, Stewart and Peter went to try to find out what it was, but I never heard anything else or found out what it was. Quite a few of the boys smelt it as well."
5. " I also wish to point out that on the Thursday/Friday prior to the accident, the building shook, on the Thursday it was raining heavily and there was thunder and lightning, S McColl appeared five minutes after

the building shook and asked what had happened at this point we noticed two of the Skylight windows had cracked.”

6. This is not possible as my father was away in America at the time, he was at the Oil Show in Houston along with Nick Downie. This was all arranged through the Glasgow District Council BRS Department, I have the Contact List and also badge list proving that he was at this exhibition [**ICL/13755-13758**].

7. The fact that my father was out of the country at that time, can be supported however by Nick Downie and Colin Foard.

I confirm that the contents of this statement are true
